

Dear Mr Minister of National Education,

I want to talk about an important issue at school. Harassment has become very common in our world. People who are harassed don't dare talking about it. People who are harassed need to confide in people they trust.

And the story can go too far, sometimes it leads to suicide.

It can happen at school or at work.

I have a dream

the world would be better if people stopped harassing people for no reason.

Leaders of primary/middle/high schools must take the right measures to avoid any harassment in their establishment.

Parents must review their children's education to avoid this type of problem.

The problem of harassment can be solved if everyone gets involved.
